About Panorama Consulting Solutions

Panorama Consulting Solutions, a division of The Prescott Group, LLC, is a global leader in the enterprise resource planning (ERP), information technology (IT) and business software markets for mid- to large-sized organizations across the world. Independent of affiliation, Panorama helps firms determine IT strategy, evaluate and select ERP, financial and enterprise software, and manage implementations. Panorama also offers IT staffing solutions and facilitates related organizational changes to assure that its clients realize the full business benefits of their ERP packages. Our input and services are proven to decrease risk, accelerate progress and increase the success and value of implementations.

Quick Facts

- Panorama is completely independent and objective. We do not sell software and do not receive any kickbacks from software vendors or staffing agencies. Our consultations are based purely on the needs of each client.
- Our international team of consultants has deep experience in more than 150 different ERP systems for both public- and private-sector organizations. We know how to build and apply technology to improve your business.
- Panorama is a leader in the field and a trusted source of research and best practice development. Our proprietary tools, methodologies and applications are proven to help clients minimize costs and maximize benefits.
- We provide measurable results and a return on investment that exceeds our fees. Always.
- With offices and resources around the world, Panorama can address the complex needs of global organizations in a multitude of industries in both commercial and public sectors.

Complete Consulting Solutions

ERP Software Selection

Using a proprietary evaluation process, Panorama helps each client find the software that best fits their strategy, budget, timeframe, industry and technological infrastructure. **We are able to save clients an average of three to five times the cost of our fees.**

ERP Software Implementation

Panorama guides mid- to large-sized companies in the planning, management and implementation of their ERP, financial or enterprise software to realize increased benefits and minimize disruption. **On average, our clients implement their IT solutions in 10-percent less time and at 50-percent less cost than they would without our services.**

Software Application Development

Innovative organizations need innovative enterprise systems. Panorama offers customized software and system development, integration and solution architecture either to complement existing IT systems or in lieu of traditional enterprise systems.

IT Staffing

With specialties including mobile workforce recruiting and HR training, Panorama leverages the latest technologies to help public- and private-sector organizations build the staffing structures necessary to ensure enterprise system operability, compliance and success.

Organizational Change Management

Panorama helps clients develop and sustain long-term organizational changes to realize business improvements enabled by their new technology. Services include staff management, training and reorganization, process management, and organizational design and support.

IT Support

Utilizing Panorama's proprietary PERFECT™ methodologies, we provide boots-on-the-ground support for all aspects of an IT project – from software selection to business process modeling and customization to application implementation to end-user training and change management.

The Panorama Approach

With a focus on bottom-line results, key performance indicators and investment returns, Panorama Consulting Solutions utilizes best practices and proprietary methods to optimize technology for better business operations.

But the Panorama approach doesn't stop there. Instead, we continue to ensure clients realize gains by addressing the "human factor" – an oftentimes overlooked but critical element of any successful technology initiative. Working with existing staff – and providing new members – to ensure familiarity with the software as well as any changed roles, responsibilities or processes, Panorama is able to increase both employee buy-in and overall operational productivity.

Panorama provides support, staffing and expertise during all stages of ERP implementations. Visit **Panorama-Consulting.com** to learn more about us and our methods or e-mail **info@Panorama-Consulting.com** to get the process started today.
